

## Welcome!

### July 2023

On behalf of the Leadership Group, I am pleased to welcome you to the first edition of our monthly newsletter. The TB-RePORT International Coordinating Center in its third iteration TB-RiCC (3.0), will take the lead in organizing the newsletter with your input. (If you would like to know more about the structure and function of the coordinating center, you can find a press release [at this link](#).) The newsletter will facilitate communication about upcoming calls and events. We intend to include links to funding opportunities and articles of interest published by the RePORT networks. Again, your input will be key in shaping the newsletter. You can direct your comments to Francia Noël or Daphne Martin-Gnanadason.

### **RePORT International Annual Meeting 6-8 September 2023 Goa, India**

The primary objective of the Annual Meeting is to provide a platform for scientists, clinicians, public health experts, policymakers, and other key stakeholders to convene and exchange knowledge, advancements, and best practices in the field of TB research. The meeting will foster collaboration and encourage innovative approaches to accelerate the development of effective diagnostic tools, treatment strategies, and preventive measures.

RI Collaborators, if you have anything you wish to report or share with the RePORT International Consortium, please send us the information and we'll do our best to include it in a future month's newsletter. Copies of all prior newsletters are stored in the private portal of [reportinternational.org](http://reportinternational.org) website.

RePORT International Coordinating Center (RICC), Rutgers University | 225 Warren St,  
Newark, NJ 07103
