

RePORT International Newsletter

February 2026

In This Issue

- Update on RICC Biomarkers Study
- Presentation on the Upskill TB-Program
- Publications from RePORT
- I Love Data Week
- Community Education Material

UPDATE ON RICC BIOMARKERS STUDY

RePORT Network Sites and Project Aims

Table	Central Repository	No of Sites	No of Samples
India (1 site)	No	11 failures, 8 recruit	19 conf + 1274 samples
Philippines (1 site)	Yes	2 failures, 2 recruit	8 conf + 26 samples
Kenya (1 site)	Yes	33 failures, 9 recruit	42 conf + 22 samples
3 Africa (2 sites)	No	11 failures, 2 recruit	14 conf + 26 samples
Indonesia (1 site)	Yes	11 failures, 0 recruit	13 samples + 12 cases + 22 controls + 89 samples
TOTAL		83 failures, 25 recruit	93 samples + 378 controls + 519 samples

1. PRODIGM: Develop a machine learning signature of failure from a large panel of existing signatures

2. ANSTRING: Develop a machine learning signature of failure from a large panel of existing signatures

3. LUMINEX: Validate host blood protein signatures that predict the outcome of tuberculosis treatment

4. ANASeq: Develop a novel "gold" signature using ANAseq as a discovery-based approach

Analysis of Host Biomarkers Associated with Adverse TB Treatment Outcomes Across RePORT International Sites

By Sheetal Verma,
Sept. 17th, 2025

Virtual RePORT International Annual Meeting

PRESENTATION ON THE UPSKILL TB-PROGRAM

Build around real clinical challenges → **Expert-led learning designed for TB care** → **Interactive digital learning**

Upskill TB
Universal Platform for Skill Improvement and Learning for New TB Regimens

Upskill TB-Program

RePORT Indonesia’s Principal Investigator Dr. Erlina Burhan, MD, MSc, PhD, Professor, Department of Pulmonology and Respiratory Medicine at the University of Indonesia and Persahabatan National Respiratory Referral Hospital, Jakarta presented on the [Upskill TB-Program](#) on February 12, 2026.

Brazil

Piekos JA, Amorim G, Ridolfi F, Cordeiro-Santos M, Kritski AL, Figueiredo MC, Andrade BB, Santos AR, Haas DW, Sterling TR, Rolla VC, Velez Edwards DR; Regional Prospective Observational Research in Tuberculosis (RePORT)-Brazil consortium. [Genetic ancestry proportion influences risk of adverse events from tuberculosis treatment in Brazil](#). *Hum Genet*. 2026 Jan 6;145(1):10. doi: 10.1007/s00439-025-02809-y. PMID: 41493624.

#LOVEDATA26

Did you know that this week is International I Love Data Week? This year's theme is "Where's the Data?" – a way to get people thinking about data's journey from collection through storage and preservation. This is a time for us to provide extra appreciation for our data managers, enterers, stewards, analysts, regulators, securers, and harmonizers. Take some time to explain someone who does not work in the field of public health about the role data plays in research and disease prevention. And perhaps you can share this data-themed crossword puzzle with them!

ACROSS

- 1. All of the stages of data from creation to distribution and reuse
- 3. The transfer of material to a facility authorized to appraise, preserve, and provide access to those records
- 5. A way to represent information graphically, highlighting patterns and trends in data and helping the reader to achieve quick insights

DOWN

- 2. A violation of data integrity
- 4. Centralized, interactive, and visual display of data
- 6. Systematic collection, analysis, and interpretation of health-related data

7. Identifies informal graphical and textual representation and the entities and relationships involved in a data process

8. Outlines the structure, content, and variable definitions for a dataset or collection of data

10. Confidential, owned, and controlled by an organization

9. A movement to make research, including articles, data, software, etc., freely available online to the public

Answers: 1. Lifecycle 2. Corruption 3. Archive 4. Dashboard 5. Visualization 6. Surveillance 7. Modeling 8. Dictionary 9. Open Access 10. Proprietary

COMMUNITY EDUCATION MATERIAL

We know the challenges of stressing the importance of initiating and continuing tuberculosis preventive treatment. The image below is one that can be used as a simple educational tool as part of various mediums.

Tuberculosis:

The germs can stay hidden in the body for many years...

Many people have no idea they're infected!

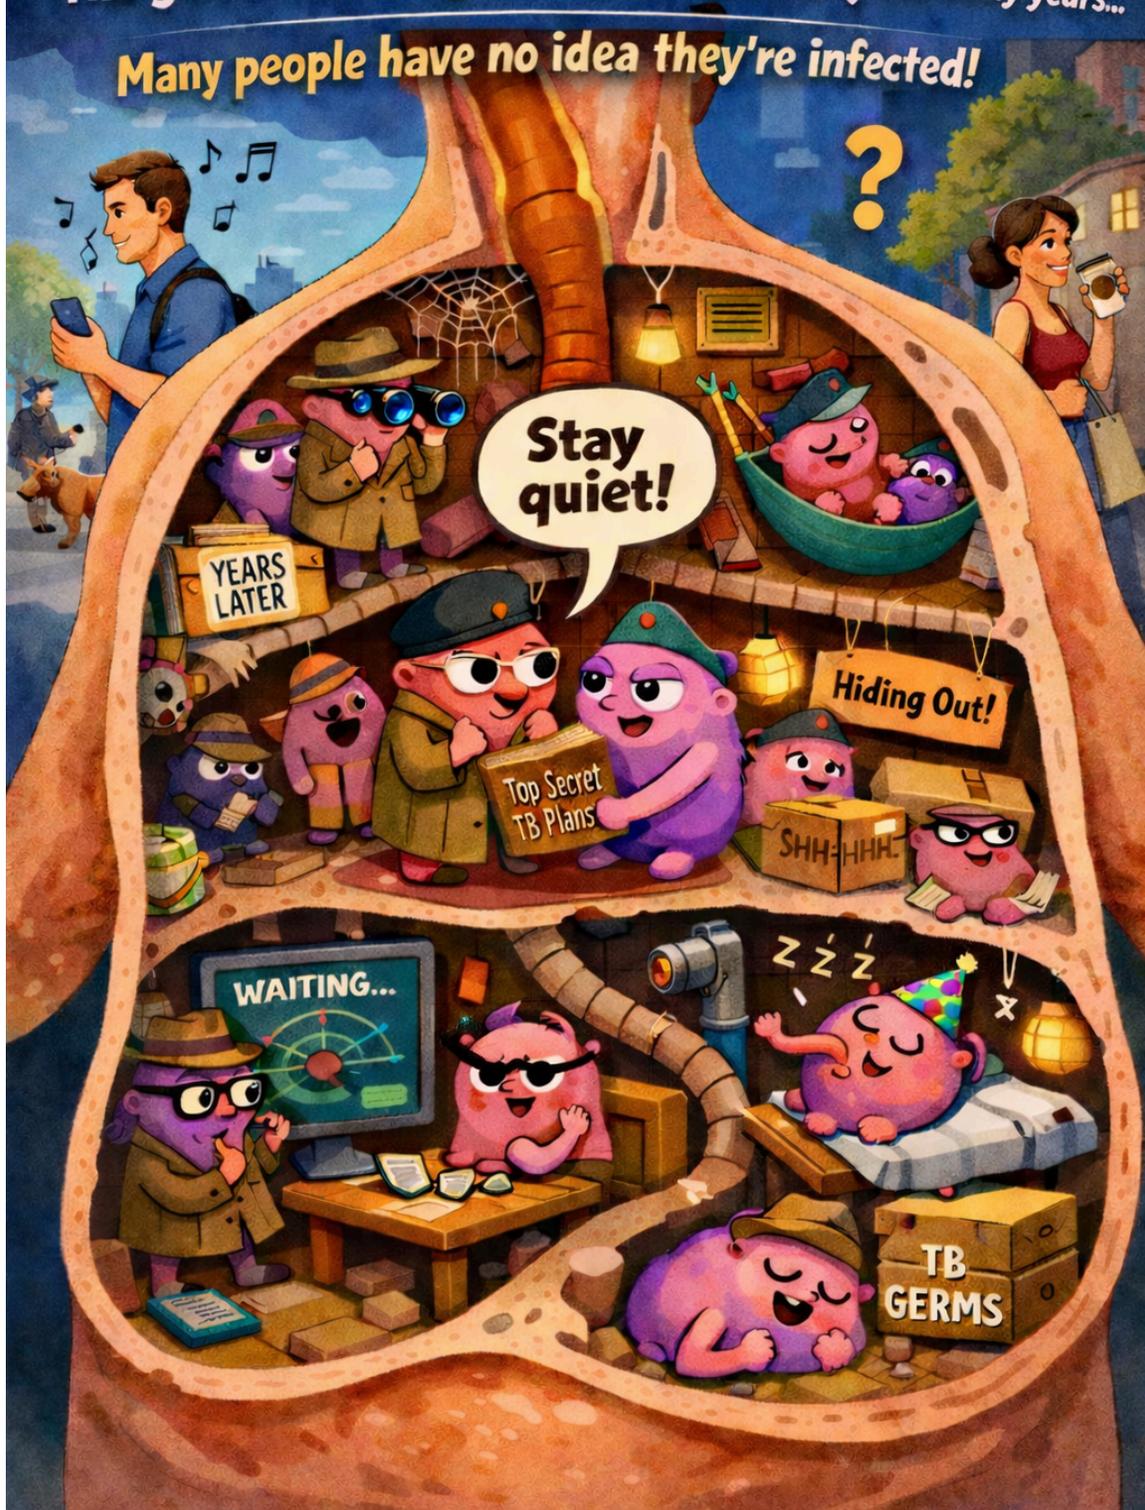

Image generated by Daphne Martin via ChatGPT 5.2 on February 13, 2026
